EMERGING FROM THE CLOSET: Facing Present Realities

Emerging From the Closet: Facing Present Realities

In the midst of life's issues, many are compelled to question everything they know. However, while some scenarios being faced may be new to us, the Bible offers perspective and sound, relevant advice.

Dealing With Your Ghosts: When Your Hurts Hurt

Rev. Michael Prince

Dealing with your ghosts provides participants with insight into the how and why their past emotional pains and hurts reemerge, linger or disrupt present life. It also introduces ways of harnessing, controlling and eliminating these past hurts from affecting day to day life.

What People Say When You Leave the Room - Personal Branding

Mrs. Valerie Charles

What people say about you when you leave the room is a reflection of your personal brand. Whether we recognize it or not, everyone is a brand although we may not consciously nurture it. In this programme, you will learn how to use the unique combination of your personality, career, skills, and experiences to market yourself as a brand and differentiate you from other professionals in your field.

Hiding Behind a Selfie: A Search for the Real Me

Bishop Don Hamilton

This age of self-adoration and a serious identity crisis is breeding the worst case of self-deception. In search of the real self, we put enhanced images of self on social media, sit and view them, then convince ourselves that the selfie image is a true picture of ourselves; we come to believe the self-propaganda. We hide behind the selfie as we search for the real self.

When Enough is Enough. When You're Tired of Faking Church

Rev. Junior Benjamin

Asking the right questions can change your life, raise your limit, and renew your loyalty.

As a member: Who am I? Why am I here? Where am I going?

As Pastor: Am I called to serve? What am I serving? Am I relevant?

Come let's talk about it.

Are You More Mentally Challenged Than You Think?

Mrs. Christine Glasgow

This session will allow for discussion on how some people function way below their potential or find dealing with personal issues overwhelming. It will highlight possible reasons why, despite having great support, some dreams are not converted into reality.

Come, let us together, chisel out some practical solutions for mental wellness!

Who Is Really Helping Whom? Helping the Wounded Healer

Ms. Michelle McIntyre

Our childhood experiences determine to a large extent how we function as adults. This session is an overview of some of the experiences and how they impact our adult worldview and ultimately our ministries. It also provides suggestions and skills to improve current ministry performance.
